

# I want to show a DVD or Blu-ray.

Check out the remote at the circulation desk. If you don't have a library card you must leave identification until it is returned. NOTE: **DVDs are recommended** over Blu-Ray discs. Recent digital management protections can cause Blu-Ray discs to read as pirated, even when they aren't, and can interrupt or halt viewing.

1. Turn the system on at the input controls at the front of the room. This will lower the projector screen and turn on projector.
2. Press the Blu-Ray button (even when screening a DVD) in same control panel as above.

3. Turn on the DVD/Blu-Ray player at the AV Rack on the side of the room.

4. Insert the Blu-Ray/DVD.
5. To make menu selections/play, use the remote. **Point the remote at the DVD player**, not the projector.
6. The volume is controlled at the front of the room from the input panel used to turn on the system (see first picture).

## After Use

1. Remove disc from player and turn off.
2. Turn off system at the input control at the front of the room. This will raise the projector screen and turn off the projector.
3. Return remote to circulation.
